The course sequence is usually taken by Juniors (hence the name).

Officially, the courses are called Experimental Physics I and II and are numbered 8.13 for the first half, given in the fall semester,

Access Free Advanced Experimental Physics II

and 8.14 for the second half, given in the spring. Each term, students do experiments on phenomena whose discoveries led to major advances in physics.

Learn physics by proper
preparation for the
experiments and by doing. •
Learn experimental
techniques.

Although experimental and theoretical physics are concerned with different aspects of nature, they both share the same goal of understanding it and have a symbiotic relation. The

former provides data about the universe, which can then be analyzed in order to be understood, while the latter provides explanations for the data and thus offers insight on how to better acquire data and on how to
