StandardController objects reference the pre-built Visualforce controllers provided by Salesforce. The only time it is necessary to refer to a StandardController object is when defining an extension for a standard controller. StandardController is the data type of the single argument in the extension class constructor.

StandardController Class | Visualforce Developer Guide ...

There is no guaranteed order in which Apex methods and variables are processed by a controller extension or custom controller.

Online Library Apex Controller Guide

Therefore, do not allow controller and extension classes to rely on another method being run, call that method directly. This applies specifically to setting variables and accessing data from the database.

Controller Methods | Visualforce Developer Guide ...

DC Control and Accessory Wiring 1. All control devices are now 24 VDC, which can be run up to 2000 feet with 14 AWG wire. 2. Control wiring must be run in a separate conduit from power wiring. Running them together may cause interference and faulty signals in some accessories. 3. A three-wire shielded conductor cable is required to connect two

P1220 APeX HSLG Manual - Nortek Security & Control

Turn on the power switch at the back. to "ON", press and hold A + pair buttons in turn for around 5 seconds. The controller will switch to Wireless Android Mode with mode indicator stays steadily on, and the controller will connect to the USB wireless receiver. Unplug the wireless receiver if it is plugged in.
