Once you've decided on the type of computer you want, you'll need to start thinking about how much money you want to spend. This is probably one of the more confusing things about buying a computer, and that's because you'll find options across a wide range of prices—from as low as \$250 to well over \$1,000.

The Guide to the GDPR is part of our Guide to Data Protection. It is for DPOs and others who have day-to-day responsibility for data protection. It explains the general data protection regime that applies to most UK businesses and organisations.

Guide to the General Data Protection Regulation (GDPR) | ICO

A GUI (graphical user interface) is a system of interactive visual components for computer software. A GUI displays objects that convey information, and represent actions that can be taken by the user. The objects change color, size, or visibility when the user interacts with them. GUI objects include icons, cursors, and buttons.

What is a GUI (Graphical User Interface)? - Computer Hope

More RAM than the highest minimum and at least as much as the highest listed recommended requirement is ideal. The following chart provides a general idea of how a computer will run with various amounts of memory: Minimum: 4 GB. Optimal: 8 GB. Smooth Sailing: 16 GB or more.
