In 2013, the International Conference on Advance Information Systems Engineering (CAiSE) turns 25. Initially launched in 1989, for all these years the conference has provided a broad forum for researchers working in the area of Information Systems Engineering. To reflect on the work done so far and to examine prospects for future work, the CAiSE Steering Committee decided to present a selection of seminal papers published for the conference during these years and to ask their authors, all prominent researchers in the field, to comment on their work and how it has developed over the years. The scope of the papers selected covers a broad range of topics related to modeling and designing information systems, collecting and managing requirements, and with special attention to how information systems are engineered towards their final development and deployment as software components. With this approach, the book provides not only a historical analysis on how information systems engineering evolved over the years, but also a fascinating social network analysis of the research community. Additionally, many inspiring ideas for future research and new perspectives in this area are sparked by the intriguing comments of the renowned authors.

This work provides a how-to approach to the fundamentals, methodologies and dynamics of computational organometallic chemistry, including classical and molecular mechanics (MM), quantum mechanics (QM), and hybrid MM/QM techniques. It demonstrates applications in actinide chemistry, catalysis, main group chemistry, medicine, and organic synthesis.

"Sparkling dialogue and endearing characters make this an enthralling read." --Sabrina Jeffries, New York Times bestselling author
The bride and groom cordially request the presence of. . . The bride's sister, Delilah, the very proper widowed Lady Hargate, and Samuel Russell, the groom's friend, a very eligible, slightly improper bachelor, at their upcoming wedding. Lady Hargate and Mr. Russell, previously acquainted during one unforgettable night in New York City when caution--and clothing--were thrown to the wind will choose to pretend they have never met before. The lady plans to avoid love and its complications at all costs. The gentleman intends to change her mind. Guests are invited to enjoy the many diversions of Millworth Manor--delightful grounds, lavish drawing rooms, secluded corners--and the chance to discover that one night may have been only the beginning. . . Praise for Victoria Alexander
"The perfect holiday treat." -The Chicago Tribune on What Happens at Christmas

Carpentry and Building Construction is widely used for vocational building construction programs in secondary and post-secondary schools. The fifth edition has been completely updated and expanded, so you can be sure your teaching is technically correct and state of the art. This comprehensive text covers everything from print reading to painting.

This book provides a detailed guide to the principles and practice of construction contracts. It is written for both students and professionals working in all branches of surveying and construction. Based around the JCT 05 Standard Building Contracts, it has been fully revised and updated to reflect the latest versions of these contracts. The book sets out clearly what should be done at each stage of the construction contract process. Each step is illustrated with examples of good practice making clear the role and responsibilities of the surveyor and how responsibilities are best delivered. This fourth edition of Contract Practice for Surveyors builds on the book's reputation for clarity and simplicity to provide the most accessible and useful introductory guide to construction contracts available today.

Explains how to create and use software designed to run on more than one type of computer system
