We can draw exactly one line through two points. All points on the same line are called collinear. Two lines are either parallel or they will intersect at a point. A line segment is part of a line with two end points. A ray starts from

one end point and extends in one direction forever. A plane is a flat 2-dimensional surface. It can be identified by 3 points in the plane.

There are infinite number of lines in a plane. The intersection of two planes is a line.

Wilson Answer Key - Kiddy Math

Given any two points, you can draw exactly one line that passes through both of them. In other words, two points determine a line. When two lines intersect, they share a single point. When two lines don't intersect,
