Guidelines for Design of Low-Rise Buildings Subjected to ...

First published in 2001, AASHTO's guidelines aim to help highway engineers select appropriate geometric designs for local and collector roads with low daily traffic volumes. AASHTO said the first edition of its low-volume guidelines addressed the design needs of roads carrying average daily traffic volumes of 400 vehicles per day or less. The new second edition of its low-volume road guidance not only replaces

Guidelines for Design of Low-Rise Buildings Subjected to Lateral Forces book. By Ajaya Kumar Gupta, Peter James Moss.

Design | Guidelines for Design of Low-Rise Buildings ...

The geometric design of facilities designated as low volume presents unique challenges to engineers across the United States. These roadways, designated by low traffic volumes thus reduced frequency of crashes, require the use of design principles unlike those applied to higher volume roads.

Accomplishing the design of a low-volume highway – its three-dimensional features (horizontal alignment, vertical alignment and

cross-section) and appurtenances to provide for drainage, traffic control ...

NCHRP - Transportation Research Board

Certain design practices, such as use of rolling dips, outsloped roads, or low-water stream crossings, are very cost-effective and practical but typically apply to low-volume, low-speed roads because of safety concerns, vertical alignment issues, or unacceptable traffic delays.
