I have to confess that after I read her first book "You had me at Hello" I was keeping this one - you know just in case there weren't any more! While I was saving it along came "It's not me It's you" for me to review so I saved it a little longer. Most of what I said in my other review applies here - Mhairi is definitely a consistent writer so far.

Her once perfect life is in shambles and the thought of dating again in the age of Tinder is nothing short of horrifying. When news of her ex's pregnant girlfriend hits the office grapevine, taking the humiliation lying down is not an option. With the plan hatched, Laurie and Jamie begin to flaunt their new couple status, to the astonishment—and jealousy—of their friends and colleagues. But there's a fine line between pretending to be in love and actually falling for your charming, handsome fake boyfriend...
