Game programming is
one common example of
event driven
programming. A game
is a closed, i.e.,

complete and self sufficient formal system that represents a subset of reality. A game is a perfect combination of actions-reactions or event-responses where every response is based on the most-recently occurred event. Elements of Game Programming

Programming. | by
Mybridge ...

I found Code Combat,
seems like really nice
way to learn python and
basic programming stuff
(maybe even better for
me to start here) but
eventually I want to
learn C++ or C#
(because I want to make
games with UE4 or

Unity5). Are there any games that I could play to learn C++ or C#? Or any other interactive solutions? Edit: Lots of great advices and posts, thanks guys and galls..

Games to learn C++ / C# : learnprogramming
C++ game coding: Learn to make games using the C++ programming language.

If you have no programming experience but want to get started as fast as possible, or if you need a quick C++ refresher then this level 1 course is the place to start. We will waste no time in getting you started on your journey to writing great games for the PC, using C++.

C++ - Game Code School

School

Students type real Python and JavaScript while playing games that encourage trial-and-error, critical thinking, and creativity. Students then apply the coding skills they've learned by developing their own games and websites in project-based courses. Reach students at their

C# is the language of
choice for learning how
to program. It is a very
well structured object-
oriented language and
avoids some of the
problems of Java. An
excellent free
programming

environment is available for C#, as well as a game programming framework. And (if necessary) moving from C# to C++ is easy.
