Milestones in Computer Science and Information Technology ...

IBM releases the IBM System/360, the first computer system to offer the concept of modular, compatible general purpose-computing. This led to the expansion of computer systems and the foundation of the personal computer market. Some would argue that the DEC PDP-11, developed in 1975, really led to the PC market. THE PDP-11 was just easier to program, had general-purpose registers and interrupts, and could be manufactured with semi-skilled labor.
