Mind to Matter: The Astonishing Science of How Your Brain...

Mind to Matter challenges the core principles of modern medicine and conventional science. Dawson Church makes a compelling case that the mind/body link is more profound than we ever suspected, and that science must expand its paradigm to include forces like consciousness, resonance, and energy.

Mind to Matter: The Astonishing Science of How Your Brain...

New discoveries in epigenetics, neuroscience, electromagnetism, psychology, vibration, and quantum physics connect each step in the process by which mind creates matter. They show that the whole universe is self-organizing, and when our minds are in a state of flow, they coordinate with nature's emergent intelligence to produce synchronous outcomes.

Mind to Matter: The Astonishing Science of How Your Brain...

The results I'm getting by applying the techniques are astonishing. They can transform your mind and the world of matter around you. I can't recommend this book highly enough."– Matt Gallant, author of Triple Your Productivity "Mind to Matter challenges the core principles of modern medicine and conventional science. Mind to Matter: The Astonishing Science of How Your Brain ...

In Mind to Matter, award-winning author Dawson Church examines the scientific facts and reviews the studies that show, step by step, exactly how our minds create material form. As each piece of the puzzle falls into place, the science turns out to be even more astonishing than the metaphysics.

Mind to Matter: The Astonishing Science of How Your Brain...

Mind to Matter is pseudoscience nonsense. Basically, it is about how a guy who lost his keys, spent hours looking for his keys, couldn't find his keys, ran into a kid who found his keys, and thinks his mind is creating things in the universe and then goes about to create a "scientific" theory on how this might be so.

Mind to Matter: The Astonishing Science of How Your Brain...

It began as a thought in someone's mind; every detail of it—the frame, the fabric, the curves, the color—was first a thought. Thoughts become things. This is manifestly untrue. I will never be a quarterback for the National Football League, no matter how earnestly I think about it. I will never be 16 years old again.

Best Health Book of 2018 - American Book Fest. Best Science Books of 2018 - Bookbub. Every creation begins as a thought, from a symphony to a marriage to an ice cream cone to a rocket launch. When we have an intention, a complex chain of events begins in our brains. Thoughts travel as electrical impulses along neural pathways. When neurons fire together they wire together, creating electromagnetic fields. These fields are invisible energy, yet they influence the molecules of matter around us the way a magnet organizes iron filings. In Mind to Matter, award-winning researcher Dawson Church explains the science showing how our minds create matter. Different intentions produce different fields and different material creations. The thoughts and energy fields we cultivate in our minds condition the atoms and molecules around us. We can now trace the science behind each link in chain from thought to thing, showing the surprising ways in which our intentions create the material world. The science in the book is illustrated by many authentic case histories of people who harnessed the extraordinary power of the mind to create. They include: •Adeline, whose Stage 4 cancer disappeared after she imagined "healing stars" •Raymond Aaron and two of his clients, each of whom manifested \$1 million in the same week •Elon Musk, who bounced back from devastating tragedy to found Tesla and SpaceX •Graham Phillips, who grew the emotional regulation part of his brain by 22.8% in two months •Jennifer Graf, whose grandfather's long-dead radio came to life to play love songs the day of her wedding •Harold, whose 80% hearing loss reversed in an hour •Joe Marana, whose deceased sister comforted him from beyond the grave •Rick Geggie, whose clogged arteries cleared up the night before cardiac surgery •Matthias Rust, a teen whose "airplane flight for peace" changed the fate of superpowers •Wanda Burch, whose dream about cancer told the surgeon exactly where to look for it •An MIT freshman student who can precipitate sodium crystals with his mind •John, who found himself floating out of his body and returned to find his AIDS healed •Dean, whose cortisol levels dropped by 48% in a single hour In Mind to Matter, Dawson Church shows that these outcomes aren't a lucky accident only a few people experience. Neuroscientists have measured a specific brain wave formula that is linked to manifestation. This "flow state" can be learned and applied by anyone. New discoveries in epigenetics, neuroscience, electromagnetism, psychology, vibration, and quantum physics connect each step in the process by which mind creates matter. They show that the whole universe is self-organizing, and when our minds are in a state of flow, they coordinate with nature's emergent intelligence to produce synchronous outcomes. The book contained over 150 photos and illustrations that explain the process, while an "Extended Play" section at the end of each chapter provides additional resources. As Mind to Matter drops each piece of the scientific puzzle into place, it leaves us with a profound understanding of the enormous creative potential of our minds. It also gives us a road map to cultivating these remarkable brain states in our daily lives.

This is a new and completely revised edition of the original manual for Emotional Freedom Techniques (EFT), one of the most successful psychology self-help techniques ever developed. Thousands of people tell amazing stories of how it has helped them with psychological problems like anxiety, depression, phobias, and PTSD, as well as physical problems like pain and stress. Author Dawson Church is the best-known researcher in the field, and this manual is based on Clinical EFT, the only version of EFT to be validated in dozens of scientific studies. Step by step, you will learn the "evidence-based" form of EFT used in those studies. You'll discover how you can identify the hidden roots of emotional problems, and how to alleviate them using EFTs "Basic Recipe" as well as advanced techniques. This book shows you how to use Clinical EFT for a variety of common conditions, including pain, fears, addictions and cravings, weight issues, insomnia, and guilt. With the healing keys of EFT, you'll be surprised at how many problems that hold you back can be quickly and easily relieved, opening up new possibilities for your life.

Mind to Matter: The Astonishing Science of How Your Brain Creates Material Reality by Dawson Church | Conversation Starters In Mind to Matter: The Astonishing Science of How Your Brain Creates Material Reality, an award-winning researcher, and writer Dawson Church explains the astounding science that shows how the human mind can create matter. With different intentions come different fields together with different material creations. The energy fields and thoughts that we cultivate in our minds can condition the atoms and molecules that surround us. With scientific breakthroughs, the link between thought to a thing can now be traced. Church shows the surprising ways intentions create matter. Men Are from Mars, Women Are from Venus author John Gray highly recommends Mind to Matter and says that the insights found in this book "can have a radical effect on your health and prosperity." One Mind: How Our Individual Mind Is Part of a Greater Consciousness and Why It Matters author describes this book as "invaluable." Happy for No Reason author Marci Shimoff says, "the boundaries of what you believe is possible for your life are stretched by Dawson's work, they may never snap back to their old shape." A Brief Look Inside: EVERY GOOD BOOK CONTAINS A WORLD FAR DEEPER than the surface of its pages. The characters and their world come alive, and the characters and their world still live on. Conversation Starters is peppered with questions designed to bring us beneath the surface of the page and invite us into the world that lives on. These questions can be used to... Create Hours of Conversation: • Foster a deeper understanding of the book • Promote an atmosphere of discussion for groups • Assist in the study of the book, either individually or corporately • Explore unseen realms of the book as never seen before.

Award Winner in the Science category of the 2020 Best Book Awards sponsored by American Book Fest Award-winning author and thought leader Dawson Church, Ph.D., blends cutting-edge neuroscience with intense firsthand experience to show you how you can rewire your brain for happiness-starting right now. Neural plasticity-the discovery that the brain is capable of rewiring itself-is now widely understood. But what few people have grasped yet is how quickly this is happening, how extensive brain changes can be, and how much control each of us has over the process. In Bliss Brain, famed researcher Dawson Church digs deep into leading-edge science, and finds stunning evidence of rapid and radical brain change. In just eight weeks of practice, 12 minutes a day, using the right techniques, we can produce measurable changes in our brains. These make us calmer, happier, and more resilient. When we cultivate these pleasurable states over time, they become traits. We don't just feel more blissful as a temporary state; the changes are literally hard-wired into our brains, becoming stable and enduring personality traits. The startling conclusions of Church's research show that neural remodeling goes much farther than scientists have previously understood, with stress circuits shriveling over time. Simultaneously, "The Enlightenment Circuit"-associated with happiness, compassion, productivity, creativity, and resilience-expands. During deep meditation, Church shows how "the 7 neurochemicals of ecstasy" are released in our brains. These include anandamide, a neurotransmitter that's been named "the bliss molecule" because it mimics the effects of THC, the active ingredient in cannabis. It boosts serotonin and dopamine; the first is an analog of psilocybin, the second of cocaine. He shows how cultivating these elevated emotional states literally produces a self-induced high. While writing Bliss Brain, Church went through a series of disasters, including escaping seconds ahead of a California wildfire that consumed his home and office and claimed 22 lives. The fire triggered a painful medical condition and a financial disaster. Through it all, Church steadily practiced the techniques of Bliss Brain while teaching them to thousands of other people. This book weaves his story of resilience into the fabric of neuroscience, producing a fascinating picture of just how happy we can make our brains, no matter what the odds.

Your genes respond to your thoughts, emotions and beliefs. The way you use your mind shapes your brain, turning genes on and off in ways that can dramatically affect your health and wellbeing. In this best-selling, award-winning book, researcher Dawson Church reveals the exciting applications of the new science of Epigenetics (epi=above, i.e. control above the level of the gene) to healing. Citing hundreds of scientific studies, and telling the stories of dozens of people who have used his ideas for their own healing, he shows how you can apply these discoveries in your own life. He explains how electromagnetic energy flows in your body and affects your cells, and how the new fields of energy medicine and energy psychology can help cases that are beyond the reach of conventional medicine. He shows how your hormonal, neurological, connective tissue, and neurotransmitter systems all work in harmony to conduct a coordinated flow of information throughout your body. As you take conscious control of the process, you produce a positive effect on your health, becoming an "epigenetic engineer" of your own wellbeing. Practical and scientific, this book has transformed the lives of tens of thousands of people. This new edition is updated with the latest research and clinical breakthroughs.

A strong and growing intuition in society today is the idea that our thoughts create our own reality. Yet it seems obvious that, try as we might, our lives are not quite what we fantasize. Is the intuition thus wrong? Through a rational, methodic interpretation of meditative insights, the validity of which is substantiated with a compelling scientific literature review, the author constructs hypotheses that reconcile facts with intuition. Mesmerizing narratives of his expeditions into the unconscious suggest an amazing possibility: just as dreams are seemingly autonomous manifestations of our psyche, reality may be an externalized combination of the subconscious dreams of us all, mixed as they are projected onto the fabric of space-time. Perhaps the laws of physics are an emergent by-product of such synchronization of thoughts. Through computer simulations, the author explores the implications of these hypotheses, with conclusions uncannily reminiscent of observed phenomena.
