This highly anticipated second edition of Splitting includes new chapters on abuse, alienation, and false allegations; as well as information about the four types of domestic violence, protective orders, and child custody disputes. Are you divorcing someone who's making the process as difficult as possible? Are they sending you nasty emails, falsifying the truth, putting your children in the middle, abusing you, or abusing the system? Are they "persuasive blamers," manipulating and fooling court personnel to get them on their side? If so, you need this book. For more than ten years, Splitting has served as the ultimate guide for people divorcing a high conflict person, one who often has borderline or narcissistic (or even antisocial) personality disorder. Among other things, it has saved readers thousands of dollars, helped them keep custody of their children, and effectively guided them through a difficult legal and emotional process. Written by a family law attorney and therapist, and the author of Stop Walking on Eggshells, Splitting is an essential legal and psychological guide for anyone divorcing a persuasive blamer: someone who suffers from borderline personality disorder (BPD), narcissistic personality disorder (NPD), and/or antisocial personality disorder (ASPD). This second edition includes new information about antisocial personalities; expanded information about domestic violence, child abuse, alienation, and false allegations; how to approach protective orders and deal with child custody disputes; and a new chapter on how to successfully present your case to decision makers. Turn to this guide to help you: Predict what your spouse may do or say in court Take control of your case with assertiveness and strategic thinking Choose a lawyer who understands your case Learn how e-mails and social networking can be used against you If you need help navigating a high-conflict divorce from a manipulative spouse, this book includes all of the critical information you need to work through the process of divorce in an emotionally balanced, productive way.

People with Borderline Personality Disorder (BPD) challenge those close to them with their often bewildering mood shifts and unpredictable behavior. For those people who have relationships with persons with BPD, whether they be relatives, friends, spouses, parents, or children, this book should prove a godsend. It delineates the ways in which borderline individuals' (BPs) behavior and communications frustrate and perplex those around them but goes further in articulating specific strategies that those close to the person with Borderline Personality

Disorder (non-BPs, as they are termed in this book) can effectively cope with these kinds of behaviors. ----Larry J. Siever, M.D.

Those raised by a BPD parent endured a volatile and painful childhood. This book offers readers step-by-step guidance to understanding and overcoming the lasting effects of being raised by a person with this disorder. Readers discover coping strategies for dealing with low self-esteem, lack of trust, guilt, and hypersensitivity.

The first love in our lives is our mother. Recognizing her face, her voice, the meaning of her moods, and her facial expressions is crucial to survival. Dr. Christine Ann Lawson vividly describes how mothers who suffer from borderline personality disorder produce children who may flounder in life even as adults, futilely struggling to reach the safety of a parental harbor, unable to recognize that their borderline parent lacks a pier, or even a discernible shore. Four character profiles describe different symptom clusters that include the waif mother, the hermit mother, the queen mother, and the witch. Children of borderlines are at risk for developing this complex and devastating personality disorder themselves. Dr. Lawson's recommendations for prevention include empathic understanding of the borderline mother and early intervention with her children to ground them in reality and counteract the often dangerous effects of living with a "make-believe" mother. Some readers may recognize their mothers as well as themselves in this book. They will also find specific suggestions for creating healthier relationships. Addressing the adult children of borderlines and the therapists who work with them, Dr. Lawson shows how to care for the waif without rescuing her, to attend to the hermit without feeding her fear, to love the queen without becoming her subject, and to live with the witch without becoming her victim. disorder leave family members feeling confused, hurt, and helpless. In *Stop Walking on Eggshells*, Randi Kreger's pioneering first book which sold more than 340,000 copies, she and co-author Paul T. Mason outlined the fundamental differences in the way that people with BPD relate to the world. Now, with *The Essential Family Guide to Borderline Personality Disorder*, Kreger takes readers to the next level by offering them five straightforward tools to organize their thinking, learn specific skills, and focus on what they need to do to get off the emotional rollercoaster: Take care of yourself, Uncover what keeps you feeling stuck, Communicate to be heard, Set limits with love, Reinforce the right behaviors. Together the steps provide a clear-cut system designed to help friends and family reduce stress, improve their relationship with their borderline loved one, improve their problem-solving skills and minimize conflict, and feel more self-assured about setting limits. Randi Kreger is the co-author of *Stop Walking on Eggshells* and the author of *The Stop Walking on Eggshells Workbook*. She operates [bpdcentral.com](http://bpdcentral.com), one of the top web-based resources for those living with BPD, and runs the Welcome to Oz online family support groups based at her web site. Co-founder of the Personality Disorder Awareness Network, Kreger is frequently invited to lecture on BPD and related issues, both for clinicians and laypeople.

Kiera Van Gelder's first suicide attempt at the age of twelve marked the onset of her struggles with drug addiction, depression, post-traumatic stress, self-harm, and chaotic romantic relationships—all of which eventually led to doctors' belated diagnosis of borderline personality disorder twenty years later. *The Buddha and the Borderline* is a window into this mysterious and debilitating condition, an unblinking portrayal of one woman's fight against the emotional devastation of borderline personality disorder. This haunting, intimate memoir chronicles both the devastating period that led to Kiera's eventual diagnosis and her inspirational recovery through therapy, Buddhist spirituality, and a few online dates gone wrong. Kiera's story sheds light on the private struggle to transform suffering into compassion for herself and others, and is essential reading for all seeking to understand what it truly means to recover and reclaim the desire to live.

Borderline personality disorder (BPD) is characterized by unstable moods, negative self-image, dangerous impulsivity, and tumultuous relationships. Many people with BPD excel in academics and careers while revealing erratic, self-destructive, and sometimes violent behavior only to those with whom they are intimate. Others have trouble simply holding down a job or staying in school. *Overcoming Borderline Personality Disorder* is a compassionate and informative guide to understanding this profoundly unsettling—and widely misunderstood—mental illness, believed to affect approximately 6% of the general population. Rather than viewing people with BPD as manipulative opponents in a bitter struggle, or pitying them as emotional invalids, Valerie Porr cites cutting-edge science to show that BPD is a true neurobiological disorder and not, as many come to believe, a character flaw or the result of bad parenting. Porr then clearly and accessibly explains what BPD is, which therapies have proven effective, and how to rise above the weighty stigma associated with the disorder. Offering families and loved ones supportive guidance that both acknowledges the difficulties they face and shows how they can be overcome, Porr teaches empirically-supported and effective coping behaviors and interpersonal skills, such as new ways of talking about emotions, how to be aware of nonverbal communication, and validating difficult experiences. These skills are derived from Dialectical Behavior Therapy and Mentalization-based Therapy, two evidence-based treatments that have proven highly successful in reducing family conflict while increasing trust. *Overcoming Borderline Personality Disorder* is an empowering and hopeful resource for those who wish to gain better understanding of the BPD experience—and to make use of these insights in day-to-day family interactions.
